

SUPRA[®] HE SERIES

**PERFORMANCE AND HIGH
EFFICIENCY FOR ALL YOUR
DISTRIBUTION NEEDS**

Carrier
TRANSICOLD

Supra[®] HE Series, the smart choice for efficient refrigeration

The Supra HE Series has been designed by merging mechanical and electric subsystems, in order to offer efficiency improvement and product compactness for a truly versatile solution. Quieter, lighter and smaller, this unit has been tested in extreme ambient temperatures in order to provide the best uptime and reliability, resulting in a quick return on investment.

KEY BENEFITS

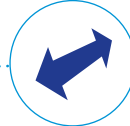

Semi-electric and variable speed fans

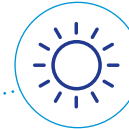

Very high efficiency
Up to +53% compared to legacy Supra*

One of the lightest weight in the segment

One of the best compactness in the segment

High ambient capability
Up to +55°C

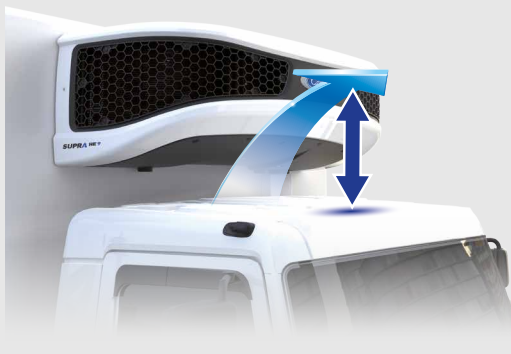

Less maintenance needs & better up-time
Compared to legacy Supra range

* Carrier metrics based on official external lab measurements

A compact solution

With one size for all models, this range maximizes compatibility with box configurations available on the market. Its compactness significantly improves space for cabin tilt and space in the internal box.

EFFICIENCY FOR LESS ENVIRONMENTAL IMPACT

With the Supra HE Series, a focus has been made on overall system efficiency in order to significantly reduce energy and refrigerant consumption and ultimately reduce polluting emissions.

SPECIFICATIONS

Model	Cooling capacity (Watts)				Airflow (m ³ /hr)	Heating capacity (Watts) +12°C/-20°C	Fuel consumption (avg. ATEE) (l/hr)	Sound power (CE 2000-14) (dB)	Maintenance interval (hrs)	Weight (kg)
	Diesel operation		Grid operation							
	0°C/+30°C	-20°C/+30°C	0°C/+30°C	-20°C/+30°C						
Supra HE 6	6300	3 570	5 030	2 760	2 570	4 180	0,85	95	2000	431
